Osborne Racing Newsletter #1

Welcome to the new look Osborne Racing Website!!!

With the new car back from the powder coaters and the old car making its way up north somewhere!! The Osborne Racing team have been busy working on the new car and also working to improve the website to keep our fans more informed on how we progress throughout the coming season. We will have weekly results and reports from at the track and from in the Workshop so make sure you check back regularly to see what's been happening!

Merchandise now available!!!

We have just received our first batch of T-shirts that are now for sale. We are all really pleased how they have come out and big thanks must go to Andrew from ASD Custom Graphics who has done an excellent job. Make sure you get in quick as a few have sold already and we want a sea of Osborne Racing shirts around Woodford Glen this season, so come on and support the team. Ts are \$30each so just Contact Mark or Casey if you want to get your hands on one or come and see us at the track. We have most sizes available.

What's happening in the shed!!!

We were all sad to see the old car off the market and head up north to her new owner!! Although it did provide some much needed space in the shed as work continues on the new car! After getting it back from the powder coaters it was time to start putting everything back together. The car is coming along nicely and looks great with all the new shiny bits. Once again though, time has proved to be our biggest enemy as always. Originally we were hoping to make a practice but now it looks as if we will have to wait until the season starts. The body and bonnet are away getting airbrushed and it will come as a surprise to everyone as to what Matt at Freshair Graphix can come up with this time! But no doubt we will not be let down!! Fingers crossed we will have the motor back from Henshaw race engines and then it will be a lot of long nights in the shed to make sure we are 100% prepared and ready for the season. It will be learning curve for everyone on the team with the new car as it has a lot more adjustments that can be made but we believe that we can have a race-winning car no matter what!!!
